MyNetwork

Information Guide

1 What is MyNetwork?

1.1 Overview

MyNetwork is the name of an online interface that connects to Customer Contact Centre (CCC) cases. This allows our network access to cases online and removes the need for emails and faxes to be sent back and forth to the CCC.

MyNetwork allows us to share and manage customer cases in real time. By using MyNetwork, you have access to more customer information and will easily be able to communicate with the CCC. This reduces wait time for customers who require a response.

2 How do I access MyNetwork?

2.1 MyNetwork access levels

There are two levels of MyNetwork Access available:

MyNetwork User

MyNetwork Super User

These are essentially the same however additionally, a MyNetwork Super User can:

View Staff Complaints / Damage to property cases in the case list

Add / Remove MyNetwork Users (refer 6.1)

Manage Network escalation contacts (refer 6.2)

Access Reporting functions (refer 7.1)

MyNetwork

Information Guide

2.2 Admin (Corp) Users

You will need to open an internet browser session (always use **Google Chrome**) and access this link:

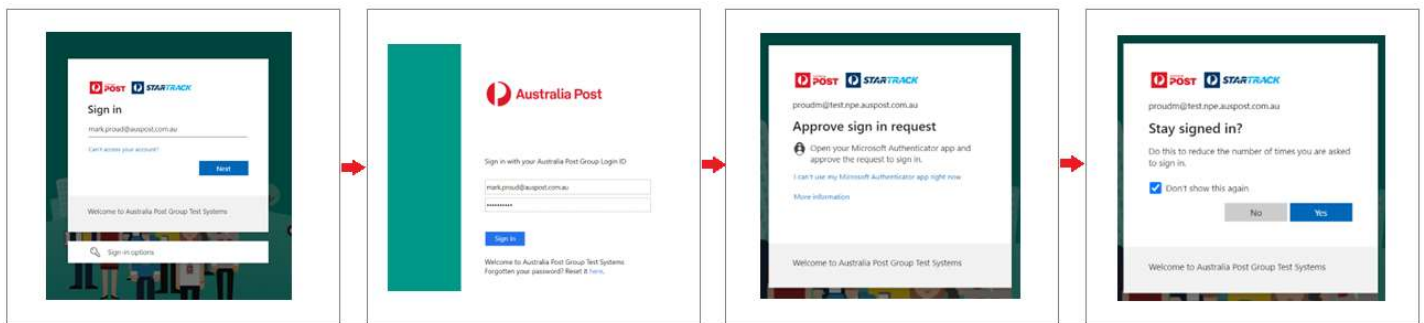

<https://mynetwork.auspost.com.au>

It is highly recommended you bookmark the link for future reference.

You will need to follow the prompts to be authenticated via Microsoft Azure to access MyNetwork (as below).

1. Enter your AusPost email address and click 'Next'
2. Enter your AusPost email and CORP password and click 'Sign In'
3. Open the Microsoft Authenticator app to approve sign-in or provide the authenticator code
4. Click 'Yes' when prompted to 'Stay signed in'

Please note: New users will be asked if they want to register a mobile phone. This is not required so please click on **I don't want to register my phone**.

Note: Do not use Internet Explorer as this browser does not support MyNetwork and functionality will be lost.

2.3 Retail Users (Counter)

Click the Windows **Start** button and select **MyNetwork**

MyNetwork

Information Guide

You will need to follow the prompts to be authenticated via Microsoft Azure to access MyNetwork (as below).

1. Enter your AusPost email address and click 'Next'

2. Enter your AusPost email address and CORP/EIS password and click 'Sign in'
3. **Please note:** New users will be asked if they want to register a mobile phone. This is not required so please click on **I don't want to register my phone.**

4. Click 'Yes' when prompted to 'Stay signed in'

MyNetwork

Information Guide

2.4 Navigation tips

When in MyNetwork, you will generally work within the same browser session. You can use browser buttons to navigate between pages should you need to go back or forth:

Use the Home button to navigate back to your list of cases:

2.5 Global Search

The Global Search at the top of your screen offers the ability to search for information recorded by the Customer Contact Centre.

This includes:

- **Cases**
- **Facilities/Outlets (I.e. Networks)**
- **Articles (only if a case has been raised for the article)**
- **Network Users**
- **Organisations (Business Customers)**

When you type in the Search field, suggested options will appear that you can click on to access content:

MyNetwork

Information Guide

3 What cases will I receive?

3.1 Case Types

The CCC will determine if the case you receive is to be categorised as Feedback or Investigation:

- **Feedback** – CCC has provided the customer with a resolution, and assigned the case to your facility (e.g. first time delivery issues, inter-store transfer etc.). The case is '**closed**' by the time you see it however, you will still need to action it by recording a response to remove it from your list.

Note: If a case cannot be actioned (for example, address details have not been provided), Feedback cases can be re-opened and assigned back to the CCC for review. (Refer 4.11a)

- **Investigation** – further information is needed before CCC can provide a resolution to the customer (e.g. missing item). Using MyNetwork, record your response and the case is returned to the CCC to resolve with the customer. Some of these cases become closed and generate customer emails based on your response selections. E.g. Disputed Delivery Scan cases (refer 4.9b)
- The Case Type can be found on the Case Print feature (refer 4.14)

4 Managing cases

4.1 Case List

When you login to MyNetwork, you will see a list of all cases that have been assigned to the facilities you have access to.

This is a complete list as by default, the Case View is set to 'All Cases' and no search filters have been applied.

MyNetwork

Information Guide

Key information is displayed before you select a case, along with some additional information:

Case Number

Clicking on the case number will take you to the Case Details screen which has detailed information about the case. This is also where you respond.

Details column

New cases received in your case list display as NEW, however they can change to either “SUI (Still Under Investigation)” or “Updated,” depending on your actions or if updates are received on the case:

- **NEW** – Indicates a new case that has been assigned to your facility.
- **SUI** – Indicates a case which you have indicated as Still Under Investigation (SUI) – (Refer 4.10)
- **UPDATED** – Indicates a change has occurred on a case. This may mean the case has either; closed since being assigned to your facility (i.e. a Delivered scan has occurred) or, further information has been received on the case.

Clicking on the case number will take you to the Case Details screen where you can provide a response.

Updated cases will display a banner message with information about what has updated.

Escalation

Cases that have not been responded to within our Service Level Agreements (SLA) will display the below icon to notify you that the case has escalated.

Note: When a case escalates, an email is sent to the point of escalation recorded against that facility.

Tip: To view escalation contacts, search and select your facility name using Global Search. Super Users can make changes to team members listed as the points of escalation.

Sent to Network date

This is the date/time the case appeared in the case list.

Reference ID

This will either be an article related tracking number, or a service reference (i.e. Mail Redirection Service; Customer Reference Number (CRN))

MyNetwork

Information Guide

Customer Type

This defines the customer segment that the case relates to.

Note: Enterprise customers are our high value business customers and have a 24 hour SLA. All other customer types have a 48 hour SLA. Cases not responded to within these timeframes will escalate.

Enquiry Subtype

This defines what the case is about. E.g. Missing Item, Disputed Delivery Scan...etc.

Network Name

This column displays the facility the case has been assigned to.

Tip 1: If you are assigned to more than one facility, you can make use of the '**Network Name**' search filter (above the case list) to only return cases for a specific facility.

Tip 2: Columns that can be sorted have an arrow to right of column header – as below.

Tip 3: Use the search bar located top left above the case list to search a case in your case list – as below.

Search the case list

MyNetwork

Information Guide

4.2 Viewing and responding to a case not displayed in the Case list

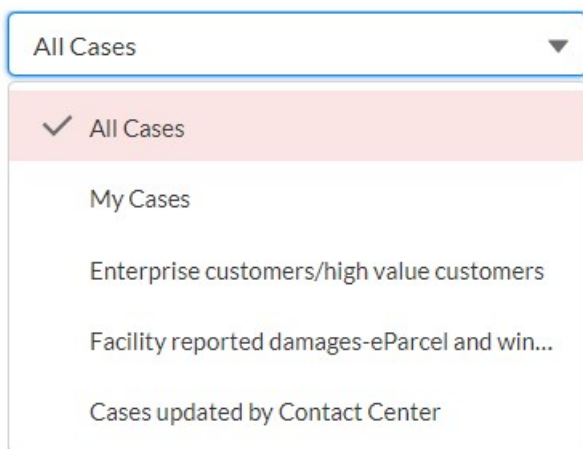

There are times when you may wish to update a case you handled previously or have information relevant to the CCC that you wish to have recorded in an existing case. This could be from a direct customer interaction or an incident that has occurred relating to an existing case.

To update a case that is not in your case list, use Global Search. Selecting the case number will take you to the case details page and you can update the case accordingly.

4.3 Case List Views

There are several case list views that can be used to display specific cases in the case list. By default, 'All Cases' will be displayed when you login.

Tip: Team members responsible for eParcel damages can make use of the 'Facility reported damages' list view.

MyNetwork

Information Guide

4.4 Case Search Filters

Case search filters can be used to display specific cases in your case list.

The below example shows how you would search for High Priority, Missing Item cases in the postcode locality of 3000.

Printed	--Select--	Product Category	--Select--
Priority	High	Enquiry Subtype	Missing Item
Addressee Postcode(s)	3000	Network Name	Search Network...
Case Number			
<div>Clear Search</div>			

Tip: Multiple addressee postcodes can be searched simultaneously.

Tip: To remove all search filters, press the 'Clear' button.

4.5a Case assignment – Assigning a case to yourself

Users have the ability to be able to 'assign' themselves cases by making use of the 'Assign to self' button.

To assign a case to yourself, select the check-box to the left of the case, then click the 'Assign to self' button.

Assign to User Assign to self Print

4.6b Happy Parcels

Happy Parcels is a dashboard which tracks the journey of a parcel in real-time.

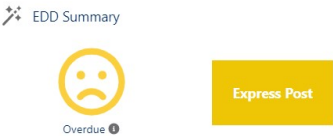

On the network response screen, all dashboard components associated with an article on the case are made available and can be expanded or collapsed by clicking on:

> Happy Parcels

To retrieve similar information for any article, click Happy Parcels on the menu bar, enter the article number and search – as below.

Dashboard Components Explained

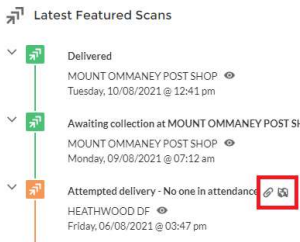

Component	Description
Status Bar	<p>The latest article status will be highlighted in green. E.g. Delivered article</p>  <p>Tip: hover your mouse over any completed status to see when it happened.</p>
EDD Summary	<p>The emoji you see depends on the status of the parcel and to the right shows the service used. E.g. Overdue Express Post parcel</p> 
Estimated Delivery Dates (EDD)	<p>The SAP EM date is the EDD the customer would have been notified of when their item was first sent.</p> <p>The Happy Parcels EDD is dynamic and uses machine learning to better predict the date and item will be delivered.</p>
Sender Details / Addressee Details	Sender and Addressee details on the manifest.

MyNetwork

Information Guide

Latest Featured Scans	<p>The three most recent “featured” scans.</p> <p>Tip: If an image is captured against one of these scans, click on the paperclip icon next to the scan event to view the image.</p> <p>Tip: Click the map icon to open Google Maps to see the location of the scan.</p> 
Article Details	Applicable features for an article will be shown here. E.g. if an article does not have Extra Cover, this information is not included.
Looping	Gives an immediate visual indication of whether an article is looping between facilities.
Missorts / Unusual Location	Identifies if a parcel has been missorted or is taking a different route from normal.
Distance	<p>Provides an indication of whether the GPS recorded at the time of delivery matches the manifest address.</p> <p>Tip: Click on ‘View in Maps’ to see Google Street View of the delivery location</p>
Manifest Assessment	Identifies if a merchant is prone to early or late manifesting.
In-transit Redirection / Merchant Recall	Identifies if a parcel has been redirected and from where.
Safe Drop	Information about the Safe Drop status of an article. If an article has already been Safe Dropped, the image will be available to view.
Signature on Delivery	If a signature was captured on the delivery, it will appear here.
Event Messages	Full list of event scans and can be sorted by clicking on column headers.

MyNetwork

Information Guide

4.7 Customer Contact Centre (CCC) Comments

Comments provided by the CCC appear in the Case Description. Required actions will be recorded here.

The screenshot shows a web interface with two main panels. The left panel is titled 'Customer Contact Centre Comments' and contains a 'Case Description' text area. A red arrow points to the top-left corner of this text area. The right panel is titled 'Network Response' and contains a 'Network Comments' text area. Below the 'Network Comments' area are three form elements: a dropdown menu labeled 'Quality of the case' with '--None--' selected, a checkbox labeled 'Still Under Investigation', and a search bar labeled 'Reassign Network'. A red 'Save Update' button is located at the bottom right of the 'Network Response' panel.

4.8 Network Response

Every Case will require a selection from the associated pick list menus as well as Network Comments to advise the CCC of your actions and the outcome.

Tip: Always make use of the 'Still Under Investigation' check-box when providing case updates throughout the course of the investigation. The CCC will be able to see these updates should the customer contact us prior to the outcome being provided.

MyNetwork

Information Guide

4.9a Network Response (Updated Case)

When you open a case that displays in your case list as **Updated**, the Network Response section is slightly different. You are provided with the option to 'Acknowledge' the update with or without providing a response.

There will also be on-screen messaging displayed, providing information on what's caused the case to 'Update'.

Acknowledge

Acknowledge the update without the need to comment. The case will be removed from your case list.

Acknowledge and Respond

Acknowledge the update whilst providing a comment. The case will be removed from your case list and the comment will display for the CCC. This option is preferred to assist the CCC in handling the next steps.

Network Response

Network Comments

Acknowledge

Acknowledge and Respond

MyNetwork

Information Guide

4.9b Network Response (Disputed Delivery Scan)

For Disputed Delivery Scan cases, mandatory picklist selections are displayed. Most selections will result in a customer email being generated. This provides the user the ability to email the customer and close the case. This reduces unnecessary work being referred back to the CCC and ensures the customer has a quicker response to their case.

Note: In the event that the selections do not match the outcome, select “Other – back to CCC for resolution.” This will send the case back to the CCC with your comments instead. This selection should only be used as a last resort.

Note: the customer will not see your network comments, they will only receive the email that is generated.

The screenshot shows a web form titled "Network Response". It contains several dropdown menus and checkboxes. The "Address Type" dropdown is set to "Residential". The "Delivery officer knowledge" dropdown is set to "Recalls - safe dropped". The "Delivery Information" dropdown is set to "Letterbox". The "Network Comments" text area contains the text "Delivered to letterbox on the property.". The "Quality of the case" dropdown is set to "Excellent". There is a checkbox for "Still Under Investigation" which is currently unchecked. At the bottom, there is a "Reassign Network" field with a search icon.

Once the selections are made and Save Update is pressed, a preview of the customer email is displayed, giving the options to the user to proceed and send the email or change their selections if required:

Please read the email preview carefully as this will be sent directly to the customer and the case will close.

The screenshot shows a preview of an email that will be sent to the customer. At the top, it says "NOTE: Email in below format will be sent to Customer". The email content is as follows: "To: mark.proud@auspost.com.au", "Australia Post", "Help & Support", "Reference 18199459", "Update for Investigation - 18199459", "Hi Mark", "Re: Article", "We have an update on the delivery of your eParcel- Regular item.", "I have met with the driver responsible for the delivery of this item, and after reviewing route and tracking information, they re". At the bottom, there are two red buttons: "Change Selections" and "Send Email and Update Response".

MyNetwork

Information Guide

4.10 Still Under Investigation (SUI check-box)

Checking this box allows you to record updates on the Case which are visible to the CCC while you are working on the final outcome. When providing the final outcome, unselect the SUI check-box and press Save Update.

4.11 Further CCC action required

Selecting this option allows Feedback cases that have been recently closed to be re-opened and sent back to the CCC.

Note: Use this option when you do not have enough information to action the case or, if the situation has changed and the CCC needs to be in further contact with the customer.

4.12 Reassign Network

This feature allows for the case to be reassigned to another Australia Post Facility (Delivery or Retail). To use it, click the magnifying glass and a pop-up window will appear. Search for the name or facility work centre code and press Go, then click on Network Name and press Save Update to reassign the case.

Note: When searching fields other than Name, select the All Fields radio button, prior to pressing Go!

The screenshot shows the 'Lookup' interface with a search bar containing 'melbourne gpo' and a 'Go!' button. Below the search bar are radio buttons for 'Name' (selected) and 'All Fields'. A link '< Clear Search Results' is visible. The 'Search Results' section shows a table with one result:

Network Name	Comment	Record Type	Contact Method
MELBOURNE GPO POST SHOP	For all PO Box enquiries, contact the Melb GPO Private Box Centre (WCID: 352794)	Retail	MyNetwork

4.13 Save Update

This saves your selections and notes in the case. If you had previously updated a case with the **Still Under Investigation** box checked, you'll need to uncheck it before pressing Save Update.

MyNetwork

Information Guide

4.14 Printing a case from the Case Details page

When opening a case, the print button is located towards the top right of the screen above the Case Details section.

Case Print

Note: After clicking case print, the 'Printed' column in the case list will be updated from 'No' to 'Yes'.

4.15 Bulk printing cases from the Case List

It is possible to print a case or multiple cases from the case list.

To do so, check the case(s) you need to print, then click the Print button located to the top right of the case list. This will open a new tab on your browser and group all selected cases into a PDF document ready for printing.

Please note: A maximum of 30 cases can be printed at the same time.

Tip: To display all cases in your case list that have not yet been printed, make use of the 'Case Search Filters' (I.e. select Printed = No, then click Search)

Tip: Checking the box to the left of the Case Number header will select all cases in the case list.

MyNetwork

Information Guide

4.16 Poster Notes

Internal facility notes that do not need to be seen by the CCC can be recorded here. Think of this as your personal scribble pad!

Note: These notes are not private and can be seen by other users of MyNetwork.

Tip: If comments are relevant to the investigation, please make use of the Still Under Investigation (SUI) checkbox and click Save Update. The CCC can see SUI updates, should the customer make contact prior to an outcome being provided.

▼ Poster Notes

Use this as a scribble pad for internal facility notes only and not investigation responses. Notes recorded here are not private. Please make use of the Still Under Investigation checkbox when adding updates to the investigation.

MyNetwork

Information Guide

4.17c Geo Precision and Outside Delivery Radius

Geo-Precision

How correct the GPS co-ordinates are (measured in metres).

E.g. a value of 20m means we can draw a circle around the pinpoint that is 20 metres wide and we can confirm that the scanner is within this circle.

Outside Delivery Radius

If the Geo-Precision is less than 100m, a check will then be done on whether the driver was within the delivery radius.

Note: the acceptable Delivery Radius is set to 100m.

E.g. If the Geo-precision is less than 100m and the GPS location of the scanner is more than 100m away from the manifested article address, it will display “Yes” in MyNetwork, meaning the driver received a scanner alert asking them to check they’re at the correct delivery address.

The data for Geo-Precision and Outside Delivery Radius is available via EVENT MESSAGES > Event Details – as below.

EVENT MESSAGES										RELATED LISTS	
Event Details										Map Directions ⓘ GPS Pin Drop	
act No.	Round No.	Geolocation	Device User	Comment	Signatory Name	Event Source	Sender ID	Event Type	Container ID	Outside Delivery Radius	Geo Precision (metres)

MyNetwork

Information Guide

Below is a brief description of each column header in the Sorting Details (NIMS)

Sorting Details – Column header	Description
Event Type	Type of event
Actual Time	Date time of event when it happened
Component ID	Unique ID of the machine component where the event occurred
Component Name	Name of the Machine Component
Component ID - Routing Outlet	Logical outlet ID of the machine based on the detected DPID/postcode details on the parcel
Component Name - Routing Outlet	Logical outlet name of the machine based on the detected DPID/postcode details on the parcel
Component ID - Actual Destination	Actual outlet ID of the machine in which the article was sorted to
Component Name - Actual Destination	Actual outlet name of the machine in which the article was sorted to
Output Status	The status of the output from the machine
Output Reason	The reason for the sort decision
Routing Result Source	Categorisation of the routing data source
OCR/VCS - DPID	Identifies the delivery point for the unique article
OCR/VCS - Postcode	Identifies the delivery postcode for the unique article
Default - Article DWS Height	Default height of the article [mm]. Assigned when the height of the article is less the lower limit
Actual - Article DWS Height	Actual height of the article detected when being processed through the machine
Default - Article DWS Length	Default width of the article [mm]. Assigned when the width of the article is less the lower limit
Actual - Article DWS Length	Actual width of the article detected when being processed through the machine
Default - Article DWS Width	Default width of the article [mm]. Assigned when the width of the article is less the lower limit
Actual - Article DWS Width	Actual width of the article detected when being processed through the machine
Default - Article DWS Weight	The weight of the article in grams
Actual - Article DWS Weight	Actual weight of the article detected when being processed through the machine
Container ID	Unique identifier the sorter applies to the container currently attached to the outlet
VISA Label - Line 1	Destination Line 1 Text
VISA Label - Line 2	Destination Line 2 Text

Information Guide

4.18 Related Lists

Several components that contain case information and history can be accessed on the Case Details page within RELATED LISTS (found to the right of the Event messages).

Here you will find

- Existing Network Responses (refer 4.19)
- Case history
- Case Comments
- Attachments (refer 4.20)
- Emails
- Faxes
- Case Milestones (refer 4.22)

4.19 Existing Network Responses

Cases that have previously had a network response will display an on-screen message to remind team members to review previous network responses on the case, prior to saving an update.

To view previous network responses, click on **RELATED LISTS**.

Network Responses (Related Case) is where you can review existing network responses.

4.21 Uploading an attachment

To upload an attachment to a case, open the Case Details page, click on RELATED LISTS, scroll down to 'Attachments' and click on 'Upload File'. This will allow you to attach a file to the case from your computer.

Attachments (0) [Upload Files](#)

[Upload Files](#)

Or drop files

Note: Retail users must use a back office/Admin PC to upload attachments

MyNetwork

Information Guide

4.22 Case Milestones

The case milestones component on the case details page provides a visual display of the time remaining before a case escalates.

When a case escalates, an email is sent to the point of escalation listed against the facility. (Refer 6.2)

The below example shows a case that has already escalated to tier 1, 2 and 3 escalation points and if not responded to within 8 hrs and 6 mins, will trigger and email to the fourth point of escalation listed against the facility.

Note: the colour of the case milestones bar will change from green to amber to red for each escalation tier until a response has been provided back to the CCC.

Note: Case milestones will continue to progress when updates on the case are made when the 'Still Under Investigation' check-box is ticked.

MyNetwork

Information Guide

4.23 Geolocations and Google Maps

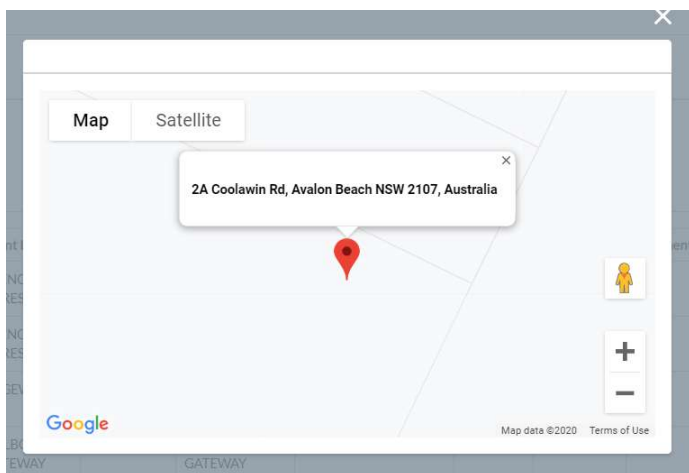

A geolocation is the geographical location of a scan event.

This information is available in MyNetwork within the Event Messages on the case details page and will only display if the data has been captured within SAP EM.

To view a geolocation via Google maps, click on the hyperlink '**Click to view map**'.

Clicking on ‘GPS Pin Drop’ will open Google Maps and allow the user to compare the below addresses

- Addressee address (I.e. the address captured on case)
- Delivered address (I.e. the geo-location at the time of the ‘delivered’ scan)
- Manifested address (when available, I.e. if a parcel has been manifested)

Tip: Click the + and – buttons or use your mouse wheel to zoom in/out on the map

Tip: Click on the ‘pin’ will display the address on the map

MyNetwork

Information Guide

5 Forms

Depending on your Facility, you will have access to either retail or delivery related forms.

Retail users will have the following form options available.

- **Damaged articles / Missing contents**
- **Lost article**
- **Delivery concerns or issues**
- **Mail Redirection or Mail Hold**
- **Staff related feedback**
- **Something else**

Delivery users will have access to a single form

- **eParcel damages**

Note: If you do not see the correct form, please contact the MyNetwork Support team.

5.1 Accessing forms

To access the above forms, click **FORMS** on the menu bar – as below:

5.2 Completing the forms

The form will guide you through what needs to be completed and you will be prompted if required information is missing.

Note (retail users): If your outlet is not listed under “Select your outlet” please have your Postal Manager update your MyNetwork access.

Note (eParcel damage users): If your facility is not listed under “Select your facility” please have your line manager update your MyNetwork access.

5.2a Retail users – Processing compensation

For detailed information on compensation and process guides, please refer to:

- MyNetwork – Step Guide,
- MyNetwork Assessing Compensation Claims – Information Sheet

These are available on **POP at Knowledge Hub | People / Processes | Systems | MyNetwork**

MyNetwork

Information Guide

Things to remember when paying compensation

- A maximum of **\$100** can be paid for contents and **\$50** for postage.
- As below, error messages will display when the amount entered exceeds these limits.

* Amount compensated for contents (\$)

\$120.00

As total exceeds \$100, click 'No' to send to CCC for review

* Amount refunded for postage (\$)

\$60.00

As total exceeds \$50, click 'No' to send to CCC for review

- Once you have completed the form you will need to process the transaction in EPOS:
 - **TC 1068** for contents or service value.
 - **TC 141** for postage.
- Provide the EPOS receipt to the customer as their reference.

MyNetwork

Information Guide

5.2b Using the forms

There are three key lookup features to assist you in completing the forms. They are:

- Tracking number
- Customer
- Address

Tracking number

When entering a tracking number press the magnifying glass to trigger a search of known articles. If the tracking number is verified then magnifying glass will change to a V you can press Update Form which will complete any known address fields.

Tracking number ⓘ

JDQ021778901000910903

✓

Update Form

Customer

This search will help you find customers that are known to Australia Post. You can search for them using only their phone number, emails address or MyPost Customer number.

Customer lookup

🔍 mynetworksupport@auspost.com.au

👤 John Smith (Consumer)
John Smith · 0411123456 · mynetworksupport@auspost.com.au

If a customer record is matched, you will need to click on the match to complete the customer section of the form. If there is no match, complete the fields as required.

Always try to capture a contact number and email address where possible.

Address

This search will find known addresses in the Australia Post database. When you begin typing an address, select the matched address as this will automatically complete the address section of the form. If there is no match, all required address fields need to be completed.

* Customer address ⓘ

🔍 111 Bourke Street Melb

📍 111 Bourke Street, MELBOURNE VIC 3000

MyNetwork

Information Guide

6 Managing Networks (Super User)

6.1 Viewing network details and managing team member access

In MyNetwork individual facilities/outlets are referred to as 'Networks'

To look up a Network, enter the name into the Global Search at the top of the screen and click on the suggested options (for this example we will use Oakleigh South PDC).

Note: Always select the facility name that has '**Network**' below the name (do not select options that have Organisation below the name)

Tip: If you click Search rather than choose from the drop-down list, you will see anything on file for the chosen Facility, including cases, networks, articles etc. From here, select the Network tab at the top to be taken to the network section.

Tip: Recently viewed networks can be viewed by clicking on 'Manage Networks'

MyNetwork

Information Guide

There are two tabs on the chosen Network screen (as seen below):

DETAILS tab– Displays Facility contact information and escalation points (refer 6.2)

To add an existing MyNetwork user to your Facility, click the **New Network User** button and search their name, select and save.

Note: If you are unable to locate a user in the search field, they more than likely do not have a MyNetwork user account. You will need to raise a MyIT request

This can be done:

Online via MyIT at <https://auspostprod.service-now.com/myit/>

Ensure **MyNetwork** is selected as the business application.

Phone 132 131

RELATED tab– A Super User can remove a team member's access within the Network Users section by clicking on the drop-down arrow next to a name and selecting '**Delete**'.

<input type="checkbox"/> Existing User	Is User Active	
18 <input type="checkbox"/> Mark Proud (MyNetwork)	<input checked="" type="checkbox"/>	<div>▼ Edit Delete</div>
19 <input type="checkbox"/> Test A	<input checked="" type="checkbox"/>	
20 <input type="checkbox"/> Gunith Devasurendra	<input type="checkbox"/>	
21 <input type="checkbox"/> Standard MyNetwork User	<input checked="" type="checkbox"/>	

Note: If the 'Is User Active' column is un-checked and this team member requires MyNetwork access, please contact the MyNetwork Support team as their license will need to be re-instated.

MyNetwork

Information Guide

6.2 Managing escalation points (Super Users only)

Network escalation contacts are displayed in the Details section. These are used in the following situations

- **Staff complaints**
- **Damage to property**
- **Un-answered cases**

Important: These contacts should be maintained regularly, in particular for team member movements or recreational leave / extended sick leave occurs. Best practice for who these contacts are is a decision based on local hierarchy leading to area support. E.g. a supervisor (2IC), Facility manager, area manager etc. There should be no less than two of these contacts, three is recommended, however up to five is allowed.

A screenshot of a web form titled "Network Escalations". It contains five labeled input fields: "Email 1" with the value "John.Smith@auspost.com.au", "Email 2" with "Peter.Johnson@auspost.com.au", "Email 3" with "Barry.Crocker@auspost.com.au", "Email 4", and "Email 5".

To edit the escalation contacts, select Edit in the top right corner of the Network display (Edit is located to the left of the 'New Network User' button).

A screenshot of the "Network" interface for "OAKLEIGH SOUTH PDC". At the top right, there are three buttons: "+ Follow", "Edit", and "New Network User". The "Edit" button is highlighted with a red rectangle. Below the buttons, there are tabs for "DETAILS" and "RELATED", with "DETAILS" being the active tab. To the right of the tabs is a search bar with the placeholder text "Search this feed..." and a dropdown menu.

Make the changes required, checking the email addresses are correct and press **Save**.

Tip: Always copy/paste email addresses from Outlook contact cards to avoid typos!

MyNetwork

Information Guide

7 Reports

7.1 Reporting functions

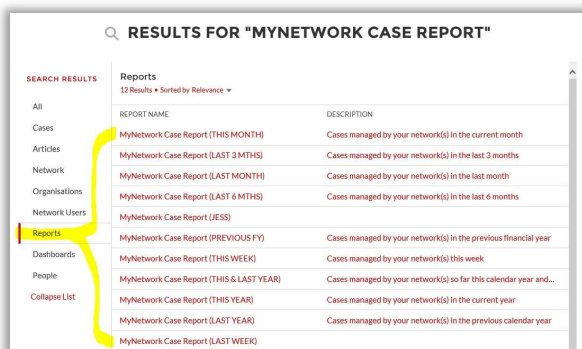

Several pre-defined reports can be accessed within MyNetwork and are made available to all team members.

7.2 Case reports

MyNetwork allows for case reporting on facilities you have been assigned to. The data in the report includes responses from the network and can be exported into Excel for easy management.

To generate a case report, search **MyNetwork Case** in the Global Search bar and press enter.

Click **Reports** on the left then select the desired report.

When the report is displayed on screen, press the triangle and select **Export**.

On the next screen, select **Details Only** and press **Export** to create an Excel file.

Please note: Several other reports that relate to the deliveries network are housed in the **Deliveries MyNetwork Reports** folder and can be access via the 'Reports' tab.

MyNetwork

Information Guide

7.3 Online form history

To obtain a complete history of online forms raised by your facility, two reports have been made available.

One relates to retail online form submissions and the other relates to team members in the deliveries network responsible for submitting eParcel/wine damage online forms.

- **My Outlet online forms raised**
- **My facility eParcel damage forms raised**

Using retail as an example, search the name of the report in the Global Search bar and select the report from the drop-down.

Tip: As you start typing the report name, you will see it appear as an option to select. There is no need to click search.

Click on the filter button.  Click on **Originating Network**, enter the name of your outlet as it appears in the system and click **Apply**.

Tip: Click on **Opened Date** to sort with the most recent forms at the top.

If you would like to export the report into Excel, click the down arrow and then **Export**.

MyNetwork

Information Guide

8 Other Features

8.1 My Profile

To access your user profile, click My Profile after clicking your name at the top right of the screen:

The screenshot shows the MyNetwork user profile page for Mark Proud. At the top, there is an Australia Post logo and a search bar. Below the search bar is a navigation menu with links: HOME, FORMS, REPORTS, GROUPS, MANAGE NETWORKS, CHATTER, and SUPPORT. The user's name 'Mark Proud (MyNetwork)' is displayed at the top left of the profile section, next to a profile picture of a cartoon kangaroo. To the right of the name is a dropdown menu with options: Home, My Profile (highlighted), and Logout. An 'Edit' button is located next to the dropdown menu. The profile section contains a table with the following information:

Name	MyNetwork	Title	MyNetwork
Manager		Company Name	
About Me		Nickname	Mark.ProudTest1.494204303252995E12
Email	mark.proud@auspost.com.au	Phone	
Mobile		Fax	
Address			

Here you can update your profile contact information or add a photo. Any photos you add will appear next to your entries on the CCC end so be sure it is work appropriate! Don't forget to press **Save**.

8.2 Groups and Chatter – (Delivery Users)

As a MyNetwork User, delivery users are assigned to a community group which is used by the MyNetwork Support team as a communication channel to provide important updates and information.

Types of communications used:

- Outages affecting the CCC or MyNetwork
- MyNetwork related feedback requests
- MyNetwork Performance feedback

Note: Updates can be viewed within the CHATTER tab.

9 Help and Support

MyNetwork

Information Guide

9.1 MyNetwork Support team

In the event of irregular system behaviour or any other MyNetwork related questions, please contact the support team at:

MyNetworkSupport@auspost.com.au

9.2 Concerns with the case

If you would like to provide feedback or concerns on a case received from the CCC (E.g. missing information) please action the case as per usual, and email the case number and your concerns to:

CCCQualityTeam@auspost.com.au
